DOCKETED BY

Dear Arizona Corporation Commissioners,

I am sending this letter to include the voice of my company and employees with those that are expressing dismay with the effort to shut down the energy efficiency standards for energy utilities currently established by the Arizona Corporation Commission.

Our company Enviro Energy LLC has been an active partner in the energy efficiency industry since 1992. Over the years our company has listened to the concerns of consumers and has used this information to develop many low cost energy efficient products that bring real dollar savings to folks that are looking for relief from their growing energy and utility bills. Our products are proudly Made in the USA.

Our involvement with the energy efficiency industry has been motivated by the over whelming need of consumers to find low cost energy and water efficiency solutions and our mission is to help them to reduce their monthly utility bills by using these products. Since our inception we are constantly reminded that we have been very successful through the receipt of unsolicited testimonials and letters from customers thanking us for helping them to reduce their energy use expenses.

These expressions of appreciation are heart warming to myself and our staff but we know that we could have only achieved these results with the direct leadership, influence, support and advocacy of organizations like the Arizona Corporation Commission. The intention to reduce this influence will be devastating to manufacturing businesses and services organizations within the energy services industry and as well consumers will have lost an important voice for relief from high energy bills. Businesses will be forced to reduce the hours of staff, lay off staff or worse be forced to close their doors forever.

We are a small voice in the state of Arizona but we would like to include it with the many other voices that come from businesses and consumers to rethink the decision to end the Arizona Corporation Commission Energy Efficiency Standards. The work that the Commission has done to date is truly needed to be continued and is greatly appreciated by all of us.

Sincerely,

Joe Pate  
President,  
Enviro Energy LLC
